National Centre for Computing Education

Helping you teach computing

The National Centre for Computing Education is funded by the Department for Education and is being run by a consortium of STEM Learning, Raspberry Pi and BCS, The Chartered Institute for IT.

We provide support for teachers, from Key Stage 1 through to A level, to achieve our vision of a world-leading computing education for every child in every school in England.

Gain skills and confidence in teaching across the whole of the computing curriculum with our range of bursary-supported training. Whether you are new to teaching computing and computer science, or are more experienced and want to help your students achieve their full potential, we have the CPD for you.

Prioritise your professional development today at teachcomputing.org

A one-stop shop for computing education

We are offering the tools and training to support the development of teaching computer science and computing education.

National Centre for Computing Education
