

Broadband

E2BN has been providing schools with their safe, secure and reliable Internet connectivity for over 16 years. We specialise in education, we understand the specific needs of schools and academies. We are a not-for-profit membership organisation, so unlike commercial Broadband suppliers, making money is not our primary motivation, providing a high quality and cost effective solution is.

- Safe, secure and trusted
- Saving you time and money
- Unlimited usage
- Direct access to UK based expert technical advice

E2BN Broadband

E2BN Broadband provides Internet, web filtering and other services to schools and academies. We use proven products backed by dedicated support, ensuring that your school receives a high quality service. Because we have worked closely with schools for so long, we understand that one size does not fit all. For this reason we work with you to achieve the best possible solution to meet your needs.

We offer a range of options depending on bandwidth requirements, pupil numbers, device numbers, school budget and current connections to the local exchange.

E2BN Direct

This is our complete business-class package which includes as a minimum:

- The fastest Internet connectivity available
- Education specific web filtering
- All the benefits of E2BN membership
- Firewall
- Remote access (VPN)
- Private site-to-site networks
- Access to a wealth of resources from NEN - The National Education Network

E2BN Direct Gateway

If you purchase an Internet connection from an alternate provider but would like to use our firewall, web filtering and VPN services, we can install our Gateway server, giving you everything provided by the full E2BN Direct package.

Dedicated fibre-optic connections or FTTP (fibre to the premises)

The very best connection a school can get is a dedicated fibre-optic connection. Fibre optic cables are installed into the school and can deliver anything up to 1Gbs bandwidth. Typically we provide 50Mbps and 100Mbps services. These services offer a guaranteed speed at all times.

Superfast Broadband

Superfast Broadband products can deliver speeds of up to 80Mbps. Delivered over existing or newly installed telephone lines, this service is the most cost-effective available. The continuing rollout of Superfast Broadband means that there's a good chance of availability in your area.

ADSL

ADSL Broadband is available in all areas. Delivered over telephone lines, it offers relatively low speeds and is usually deployed as a back-up system to the main Internet feed.

Why should You choose E2BN Broadband?

- We are experts in education and really understand your needs.
- Unlike commercial Broadband suppliers we have no shareholders which means we are not trying to find ways to get more money out of you!
- All our packages come with E2BN Protex web filtering.
- We constantly monitor your connection, consistently meeting 99% or better up-time.
- You will have unlimited data usage.
- UK based support – access to the technicians who know your product well.
- You get E2BN membership and access to a wealth of E-Safety training and other benefits.
