

# Web Filtering

E2BN Protex is a flexible and affordable filtering system that keeps your children safe by putting you in control of your pupils' access to the Internet. Staff and pupils each have different filtering profiles. Subscribing to the Protex service enables your academy or school to tailor filtering to your own E-Safety policies.

- Ease of use
- Value for money
- Safe and secure
- Complete peace of mind

## Why choose E2BN Protex Web Filtering?

E2BN Protex Web Filtering is custom built for the education market. It has been developed and refined over many years by education specialists who understand the needs of schools.

We are a not-for-profit organisation; all income we generate simply helps us to make our products better and even more affordable. Unlike many commercial solutions, we are not trying to make an existing product fit the education market: E2BN Protex has been developed specifically for education.

## How does E2BN Protex compare to other products?

Our web filtering solution does everything you'd expect and want it to do. As members of NEN The Education Network, we know what the new threats and trends are and we ensure that our solutions are constantly updated to reflect this.

E2BN Protex is fully compliant with the Department for Education statutory guidelines 'Keeping Children Safe in Education'. This includes complying with Prevent Duty guidance by integration and automatic updating of the police assessed list of unlawful terrorist content, produced on behalf of the Home Office.

We are self-certified with the UK Safer Internet Centre. To see a direct comparison of E2BN Protex with other solutions, visit the Safer Internet Centre website and search for 'filtering provider responses'. [www.saferinternet.org.uk](http://www.saferinternet.org.uk)

## What are the key features and benefits?

### Flexible Filtering Profiles

Multiple level filtering profiles for different users such as year groups, subject groups and teachers. Time scheduling of alternate profiles which allows for specific projects and activities.

### Real-time Updates

Any changes are done in real time so, for example, if you block a site, it will be inaccessible immediately. Unblocked sites can be accessed straight away. Request a change or make a change and it's done!

### BYOD and Mobile Device Filtering

E2BN Protex is device-agnostic: all BYOD and mobile devices may be configured to use our web filtering. Staff and students logging onto Wi-Fi, whether with IOS, Android or Chromebook, can easily be filtered.

### IWF Member

E2BN is a member of the Internet Watch Foundation who provide up-to-date lists so we can block illegal content - specifically child sexual abuse content - hosted anywhere in the world, criminally obscene adult content hosted in the UK and non-photographic child sexual abuse images hosted in the UK.

### **Search Filtering**

Any inappropriate searches will be blocked regardless of which search engine is used.

### **Virtual Appliance**

You can trial ProtexLocal as a virtual machine - the small cost is refundable should you decide to sign up for a full contract.

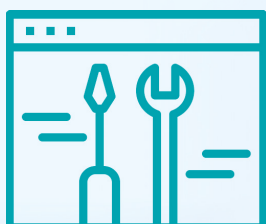

### **File Extension Blocking**

Protex checks and blocks inappropriate file types such as .EXE, .MSI, .HTA etc. It also finds and blocks known malware and phishing sites.

### **Authenticated Access**

Filter profiles can be assigned using the Active Directory group membership from your on-site domain controller. This means you can also track web usage by username.

### **UK Based Support Included**

We offer a managed service as standard; you can phone or email 24/7. Our technical services team are based in Hertfordshire and know your product inside out!

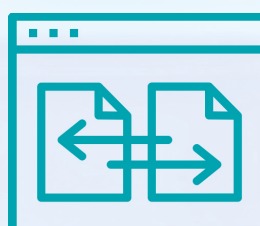

### **Comprehensive Reporting**

E2BN Protex can generate daily, weekly, 'top 100', in fact a whole array of detailed reports. If you can't find a report you need, we will help you create it.

### **Secure Hardware Platform**

On-site dedicated appliance configured to your requirements. Fully managed - if it breaks/fails we will swap it out within 24 hours.

### **Dynamic Filtering**

Unlike many solutions, Protex carries out real time checking of all content, whether the web page is http or https.

Safe, trusted and cost effective Web Filtering

## Can I try E2BN Protex?

Yes you can. We will set up a trial so you can see just how painless and effective it is. There is a small fee for the technical support needed but this is returnable when you decide to purchase.
